

KIDSNET is a Rhode Island
Health Department tracking system
for families and doctors.

- ★ KIDSNET helps families keep track of their children's vaccinations (shots) and other public health services (listed on back of card).
- ★ KIDSNET can remind families and doctors when it is time to visit the doctor for a shot or lead test.
- ★ KIDSNET can remind families if they forget or are late in getting their child a shot.
- ★ KIDSNET provides an official immunization record for entry to school, daycare and camp.
- ★ KIDSNET helps doctors find children who may be missing shots or may be at medical risk.
- ★ KIDSNET benefits everyone by helping doctors and families be sure that all kids receive complete preventative health care to keep them well.
- ★ KIDSNET information is private among families, their doctor and other public health people who provide services to them.

For more information about KIDSNET call
222-4220
